

SLIME STATION 2

It's slime time! This is a variation on the glue and borax mix, and is much more slimy and messy, so we don't do it as often.

MATERIALS

- 1 plastic cup
- 1 popsicle stick
- 1 plastic bag
- water
- glue
- liquid starch
- food coloring

PROCEDURE

1. Add 1 tablespoon of liquid starch (about 1 pump) to the cups.
2. Add 1–2 drops of food coloring to the liquid starch, and stir.
3. Add 1 tablespoon of glue (about 1 pump) to the cup and stir until it the mixture gets thick. Your slime is done when you can pick up your popsicle stick and most of the slime comes with it!
4. Pull the slime off the stick, and knead with your hands to finish mixing. It will still be pretty sticky, so be careful.
5. When you are done kneading, place the slime in a plastic bag for safekeeping.

PLEASE DON'T EAT THE SLIME!!!
